

Message from the Program Director

As one of the first movers of MBA programs held in English in Turkey, our department offers several graduate programs which receive marked preference in the Aegean region. Of course this success depends on the programs which have been thoroughly thought and designed; up-to-date, and well-structured. Our young and dynamic staff, which has high level of experience and competencies in international education and is very open to more effective and creative ways of teaching, adds value to our programs.

We have differentiated our MBA programs for different target markets. Our **MBA** (with thesis) program is more academic in nature where more advanced topics are discussed. This program takes place during the day on weekdays which would be more suitable for non-working and mostly academic career focused graduates. **Executive MBA** (without thesis) program is generally targeting working people who value self-development. Graduates who would like to enhance their business administration notion and like to discuss the cases related to their work environment are highly welcome.

We offer an online MBA program (**E-MBA**) for the professionals who believe in lifelong learning and sustainable self-development in their career and the graduates who want to establish their own businesses with time shortage and physical inconvenience. This online program enables the participants to attend courses at their convenience and to overcome the physical barriers via virtual classes.

All the MBA programs are well equipped with the same high standards of teaching and experience. These graduate programs will also provide participants the opportunity to meet people from different sectors with extensive experiences.

We cordially invite current and potential professionals to benefit from our –MBA programs to enhance their career and self development.

Prof. Dr. A. Gül Bayraktaroğlu
